

Riseman Family Theatre Specifications

The Riseman Family Theatre is designed to serve as the permanent home of Apollinaire Play Lab, an arts education program serving local youth. The specifications for the space and description of included equipment and amenities is below.

DIMENSIONS AND CAPACITY

The Riseman is 40' deep x 22' wide.

FURNITURE	
Folding Chair	60
Folding Table	2

AUDIO SYSTEM

The space includes a full pipe grid with 9ft pipe spacing and double pipes around the periphery. There are four NL4 speaker jacks located throughout the ceiling, and two full range loudspeakers clamped to the grid. The loudspeakers may be moved throughout the grid during the production period and do not need to be removed from the grid following the rental.

The booth contains an equipment rack containing one amplifiers (total of two amplified channels) and a Digital/Analogue interface. The interface can be connected to a computer via USB for up to 8 channels of output, or via 1/8" TRS cable for stereo output.

Amplifiers may be patched to the four NL4 speaker jacks using a small patch panel behind the rack.

LIGHTING

The space includes a full pipe grid with 9ft pipe spacing and double pipes around the periphery.

Six dimmer bars are evenly spaced throughout the grid. These may be moved during the production period but must be returned to their default positions at the conclusion of the run. Each dimmer bar includes four dimmed circuits and one auxiliary circuit and DMX output to feed LED fixtures.

Chelsea Theatre Works is an "Edison House" – all dimmers, cables, and fixtures have 15Amp Edison-style connectors.

Spare lamps are included in the tech booth. Blown lamps should be left beside the spares to be replaced at the end of the production period.

No expendables (including Gaff tape, tie-line, and gel) are included in the rental.
